

INFORMATION

Wood Species

R.D. Henry & Co. offers a "clear" and "rustic or knotty" variation on most species. Although each set of cabinetry passes through multiple inspection stations and hand-sorts, we cannot control the frequency and where knots, sapwood, streaks, or other irregularities may fall. Because this is a product of nature, each kitchen will have its own unique characteristics. Your order will be subject to a wood upcharge on certain species. The amount of the upcharge is notated below next to the specie's name.

Clear (All Woods): Small pin knots (under 1/4" diameter) may be visible on the front, especially on Alder. Larger, unfilled knots are permitted on the backs of doors and drawer fronts. Pinholes, gum pockets, light mineral streaking, and flecks of grey (in Beech) and brown (in Cherry) may also be visible. "Clean" varieties are selected for minimal natural character marks, although some may make it through our selection process.

Rustic (Beech, Hickory): Rustic varieties will include a light and random distribution of open and secure knots of various sizes, bird pecks, or equivalent gum pockets. Open knots that can be completely seen through will be partially filled with epoxy resin. Every rustic door will include mineral streaks, sapwood and other naturally occurring characteristics that are unique to the species, however, not every door will have knots; they are simply less frequently occurring on rustic species. Beech will also include heavy mineral coloring and streaking.

Knotty (Alder): Includes larger, open, secure knots than clear varieties. Open knots that can be seen through are partially filled from the back with black epoxy resin as a means of securing the knot. In general, we strive for at least one knot per door, and in most instances, multiple knots per door. Knots in face frames and finished ends are typically less frequent and cannot be considered a defect unless it compromises the integrity of the frame. Knots in plywood panels sometimes expose the tinted core of the plywood. This cannot be considered a defect due to the thin veneer and the brittleness of knots.

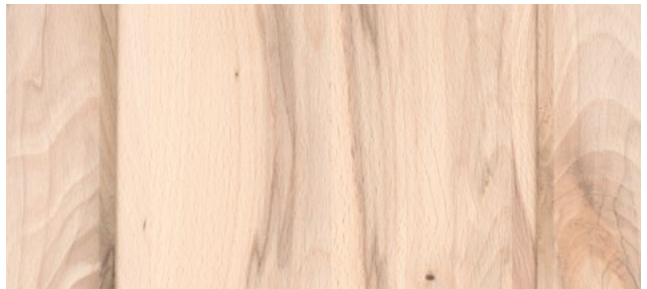

Alder | 0% Reddish-brown to pale yellow wood with soft, straight grain, even texture, and a subtle figure. Although we hand select our lumber, there will be small pin knots with larger knots possible on the back of doors. Alder mellows with age and exposure to light.

Knotty Alder | 0% Same as Alder plus larger, open secure knots. Open knots will be partially filled with resin as a means of securing the knot. Although we hand select our lumber, no effort will be made to evenly distribute the knots or those characteristics deemed 'rustic' and their occurrence would be described as random. Alder mellows with age and exposure to light.

Beech | 0% Strong wood with whitish to pale brown straight grain and small grey flecks. Although we hand select our lumber, you can expect some light mineral color and streaking which will be more noticeable on light finishes.

Rustic Beech | 0% Same as Beech plus repaired knots of various sizes and heavy mineral coloring and streaking, which is more visible on lighter finishes. No effort will be made to evenly distribute knots.

INFORMATION

Wood Species continued

Cherry | 10% A durable, moderately strong hardwood with reddish-brown hue, straight grain and fine texture. Although we hand select our lumber, you can expect some slight mineral streaks, gum or pitch pockets and a small percentage of white sapwood. These characteristics are more noticeable on lighter finishes. Cherry wood darkens over time and exposure to light.

Hickory | 0% A dense, tough, coarse-textured wood with white sapwood and reddish-brown heartwood. The color and graining patterns will have variations from black to brown in the heartwood to yellow in the sapwood. Certain stains will amplify this effect. Although we hand select our lumber, you can expect small amounts of dark mineral streaking, pin knots and even remnants of insect attacks.

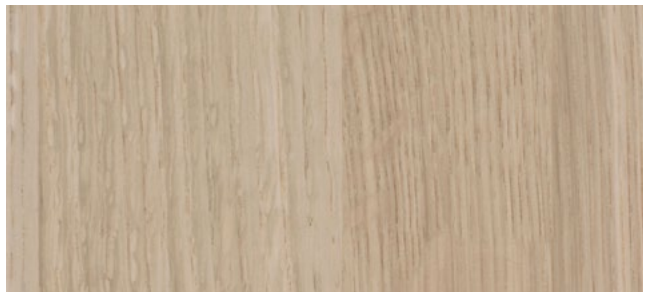

Maple | 10% Heavy, straight-grained wood with a fine texture. The sapwood is white and selected for its light color; Maple does not generally take dark colors well and may appear blotchy. On light colors the natural mineral streaks may not be concealed. Darker colors often conceal these mineral streaks.

Rustic Hickory | 10% It's a striking wood with a bold, dynamic grain pattern that showcases a beautiful range of natural colors, from rich amber browns to lighter, golden hues. Known for its pronounced knots and varied grain structure, it delivers a distinctive, rugged charm. This wood offers a balance of durability and beauty, making it ideal for rustic, farmhouse, or contemporary designs. Rustic Hickory's unique character and natural imperfections add warmth and a sense of timeless authenticity to any space.

Red Oak | 0% Timeless hardwood with a coarse texture and a pinkish-red hue. The texture of the wood varies according to the rate of growth, but typically has a strong open grain pattern with a mix of straight and cathedral grain patterns. Although we hand select our lumber, you can expect small amounts of mineral streaking, pin knots and burls as well as occasional ray flakes.

Quarter-Sawn White Oak | 18% Stable wood with pale yellow-brown to pale brown tones, sometimes with a pinkish tint. As a result of the quarter sawing process, the wood exhibits a beautiful grain texture with a uniform straight grain and a striking ray flake figure. Although we hand select our lumber, you can expect occasional pin knots and light mineral streaks.

ACCESSORIES AND MODIFICATIONS

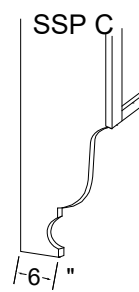

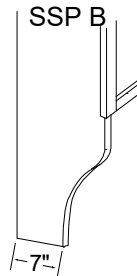

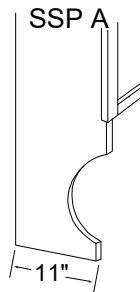

Shaped Side Panels

3 standard styles, shown below. Shaped side panels consist of flush 3/4" thick solid wood sides with one of the three details shown below. The cabinet back will extend the length of the sides if a left and right SSP are ordered. Please specify back configuration if ordering only one SSP. The maximum height of cabinet including the extension is 48", 54", or 60" tall. For example, a 30" tall wall cabinet with an SSP48 would consist of a wall cabinet with an 18" tall leg. If specifying different extension height, enter cabinet as CUSTOMWALL.

Specify left or right - choose Style A, B or C.

1" thick panels are available but may constitute a longer lead time and are shipped loose; recommended to flush out with the doors, size accordingly. A beadboard route (1 1/2" on center) or pilaster route (front edge) may be added to the 1" thick loose panel. Submit a quote for custom pricing.

SSP_48(L/R)	☒ M	\$586	48" overall cabinet height
SSP_54(L/R)	☒ M	\$619	54" overall cabinet height
SSP_60(L/R)	☒ M	\$651	60" overall cabinet height

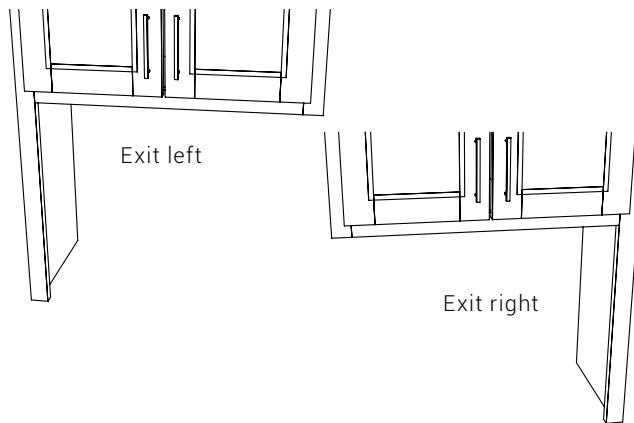

SSP_LOOSE	☒ AL	\$619	3/4" Thick Loose Side Shaped Panel
------------------	--	-------	---

Extended Sides Down ☐AI ☐AL ☒M

Extends the side and stile on a wall cabinet down to your specifications; 18" maximum extension. When extending both the left and right sides down, the back will also extend down unless noted. Enter cabinet as CUSTOMWALL, then add EXT LEFT and/or EXT RIGHT as a modification.

EXT LEFT
\$173

Extend Left Side Down
18" maximum extension

EXT RIGHT
\$173

Exit right

Extend Right Side Down
18" maximum extension

ACCESSORIES AND MODIFICATIONS

Wood Top

Specify overall size and which edges are to have CTE on the WT by using the pop-up window at ordering. Wood tops will be built to overall size unless otherwise specified. Edge routing will complement the door edge unless specified otherwise. Price includes CTE. Can be built-up, upon request, to 1 1/2" thick for double the list price. Additional CTE options are available for use on our wood tops. See CTE1, CTE3, and CTE4 earlier in this section. CTE2 will be standard. There is no extra charge for substituting your CTE, just specify on your order and on the Wood Top Form. Failure to supply all relevant information will affect your lead time. Maximum sized top shipped assembled with a spline or splines is 48" x 48". Anything larger will be sent prepped for splines (subject to spline charge). Knotty Alder tops not recommended due to open knots. We strongly suggest using clear Alder.

HOW TO ORDER; When selecting a Wood Top (WT), a pop-up window will appear in the ordering program. Follow the instructions.

1. Enter LENGTH (Grain) & WIDTH.

Provide overall size including Counter Top Edge. **NEW**

2. Select Edge Profile.

3. Select Edge Placement.

Mirror Frames

MIRRORA

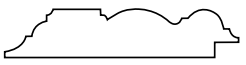

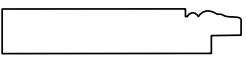

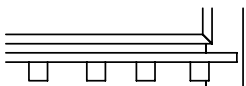

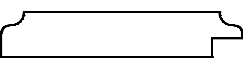

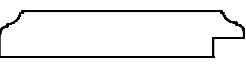

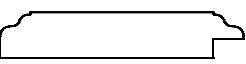

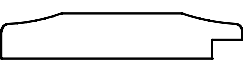

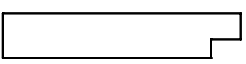

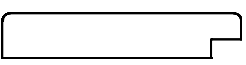

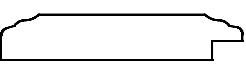

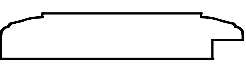

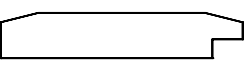

MIRRORB

MIRRORC

Outside profile matches door edge

Mirror Frames will be offered in three unique designs and 9 door edge specific options. Available in all woods and finishes to provide a perfect match to the cabinetry. Entire frame with the exception of the back plane will be finished. Frames will be constructed of solid stock material and will feature a 5/16" deep x 1/2" wide rabbet in order to accommodate 1/8" or 1/4" thick glass. Pricing will be figured by calculating the lineal foot of molded material needed and adding the **design fee of \$218**. Loose rail material available for lineal foot price.

Frame	Loose Rail		
MIRROR A \$46 per sq.ft.	MIR A RAIL \$332 p/8'stick		4 7/8" wide; 1" thick material. Mitered construction.
MIRROR B \$26 per sq.ft.	MIR B RAIL \$220 p/8'stick		4" wide; 3/4" thick material. Mitered construction. Outside edge matches door edge.
MIRROR C \$40 per sq.ft.	NA	 Front view shown	3 1/4" wide stiles and top rail; 4 1/4" wide bottom rail; 3/4" thick material. Butt joint construction.
MIRROR#10 \$26 per sq.ft.	MIR 10 RAIL \$220 p/8'stick		4" wide; 3/4" thick material. Mitered construction. Inside and outside edge features the #10 door edge.
MIRROR#13 \$26 per sq.ft.	MIR 13 RAIL \$220 p/8'stick		4" wide; 3/4" thick material. Mitered construction. Inside and outside edge features the #13 door edge.
MIRROR#15 \$26 per sq.ft.	MIR 15 RAIL \$220 p/8'stick		4" wide; 3/4" thick material. Mitered construction. Inside and outside edge features the #15 door edge.

Sales Aids Information

Sample Orders (SAM)

- Sample Orders can be used to order sales aids and samples.
- All standard eligible Sample orders will be ready to ship in 10 business days or less after confirmation, excluding holidays. See list below for items that will be ready to ship in 2 business days (if in inventory).
- The Net pricing for each item will display, not the List pricing.
- Multiple door styles and/or finishes need to be submitted on separate or sub orders.
- If you are sending in a Sample order that has longer lead time items (like sample doors) as well as shorter lead time items (like brochures), you will receive the brochures faster if you put them on a separate order. If they're all ordered together, they will ship out when the last item is complete.

Shipping Information

Standard eligible orders will be ready to ship in 10 business days or less after confirmation.

The following items will be ready to ship in 2 business days (upon availability):

- Brochures
- Catalogs (Spec Books)
- Color Blocks
- Glaze Sample Display
- Library of Color (LOC)
- Molding Sets
- Window Decals
- Door Edges
- Logo Samples
- Sheen Samples

Please refer to page I-18 of the Information Section (Co-op Advertising) or call your Sales Representative for questions pertaining to the Dealer Display Program.

Items in this section do not qualify for Display credits.

SALES AIDS

Color Blocks

Do not order color based on color blocks. You must view a Door Sample before submitting your order. If you send us a Color Block to match, your order will be applicable to match charges. **See page I-24 for finishing options.** If your order includes a Color Block with an expired date, the Color Block will not be eligible for recertification. This ensures that only current Color Blocks are used for color representation to your customers. The lower cost of the Color Block in contrast to a Door Sample helps R.D. Henry & Co. supply our Sales Representatives and Dealers with accurate, current Sales Aids.
